An American Institution

At Silk Road Rising, we share a keen appreciation for the role art plays in fostering understanding between peoples.

Recognizing that America's relationships with countries of the Silk Road have become increasingly characterized by conflict and complexity, we feel it is imperative to communicate the histories, perspectives and beliefs of Asian and Middle Eastern communities through the arts.

Through our work, we strive to create a world that values art over ideology and inquiry over dogma.

This Independence Day, as we celebrate the country that has given us a home, we invite you to embrace Silk Road Rising's core values: Discovery, Pluralism, and Empathy.
